Summary/Description

The Ocean Craft Marine 7.1M Amphibious is a rigid hull inflatable boat with 4WD amphibious technology. Four independently motorized, retractable, and steerable wheels power the boat, providing off-water capabilities.

Customizable Boat: Stuart

The Ocean Craft Marine 7.1M Amphibious is a rigid hull inflatable boat with 4WD amphibious technology. Four independently motorized, retractable, and steerable wheels power the boat, providing off-water capabilities. A reverse-chine hull shape delivers a stable and dry ride with optimized lift and minimized drag. Recommended power is 150HP. With a B-Offshore rating, this RHIB has a rating of 9 persons on the water and 8 on land. The 7.1M Amphibious is ideal for commercial, recreational, and rescue applications.

Standard features include Arctic Gray tubes with red accents, a rub rail, a white colored fiberglass hull, an anchor locker, three U-bolts, stainless steel heavy duty lifting points, forward Sampson post/bollard, LED navigation lights, a signal horn, automatic electric bilge pumps, and a 12V DC electric system.

Choose from an aluminum or fiberglass hull, air or foam filled tubes, or inboard or outboard engines. Seating arrangements are customizable and include bench seats, leaning posts, bucket seats, jockey seats, and shock mitigating seats. Add an optional T-Top, Bimini top, or cabin and choose from several console options. Also available are self-righting frames and bow and stern posts.

The four independently motorized wheels provide unparalleled efficiency and opportunity, not offered by any other boats in its class. The amphibious technology allows for straight driving onto any beach, shallow water accessibility, entry in previously inaccessible areas, rapid transition between land and water, unique flood response capabilities, and the ability to traverse submerged obstacles and varying depths.

We're proud to showcase Ocean Craft Marine at all our Florida showrooms, including:

Ft. Lauderdale, Palm Beach, Stuart, Sarasota, and Tampa Bay.
