- Epifanes varnish on rails and eyebrow

- Awlgrip “Light Gray” non-skid

INTERIOR

- Natural finish on hull sides
- Satin varnished walnut interior
- Richlight black countertops
- Ultraleather overhead removable panels on overhead

Construction

The Hood 35 is cold molded. The hull construction is vacuum laminated Eglass/epoxy outer skin using tongue and groove Douglas Fir as the first layer, followed by two additional layers of cedar applied on the 45 degree before the final fiberglass skin is applied and then paint.

The deck is made off a mold using carbon fiber and Corecell foam and Coosa high density foam in high load areas. The deck is infused to produce the lightest and strongest structure with these materials.

The hardtop is carbon composite part, infused epoxy and carbon fiber Corecell foam core and Coosa high density core at high-load areas.

Propulsion Package

The Volvo Penta Interceptor System is a boat trim system for simpler, safer and more comfortable driving. It is integrated into the Electronic Vessel Control system which makes it extremely easy to handle.

The precise manual control function can be extended with three fully automatic modes, each developed to improve the boating experience, in terms of comfort, visibility and low fuel consumption. The third mode, “Active Ride” is another smart feature that will redefine your concept of cruising comfort.

- Volvo Interceptor transom mounted 450mm blades

Mechanical Disclaimer

Engine and generator hours are as of the date of the original listing and are a representation of what the listing broker is told by the owner and/or actual reading of the engine hour meters. The broker cannot guarantee the true hours. It is the responsibility of the purchaser and/or his agent to verify engine hours, warranties implied or otherwise and major overhauls as well as all other representations noted on the listing brochure.
