Summary/Description

Custom Push Boat / Barge Assembly

This is a great opportunity for a turn-key assembly for marine construction or hurricane debris removal. This custom flat bottomed barge style push boat design is modeled after the utility boats typical of the Northwestern design. This boat is very robust, efficient, and quick yet is propped to have ample torque to push the accompanying 16' x 40' barge and excavator assembly.

The accompanying work barge is uniquely designed with the capability to maneuver independently from the push boat utilizing bow & stern thrusters and the integrated winch system.
