Fuel: Diesel

Engine 2

MTU

16V 2000 M96L

Inboard

2638HP

1967.16KW

Fuel: Diesel

Summary/Description

The carbon fibre revolution. The umpteenth leap forward in Pershing style, each and every component designed to amaze, starting with the construction material.

The carbon fibre revolution. The umpteenth leap forward in Pershing style, each and every component designed to amaze, starting with the construction material. Lightweight, fast, hyper-performing, with the most spacious, welcoming spaces and a new propulsion system, the Pershing 8X is the dream and masterpiece of the "X Generation".

Design

The sophisticated naturalness of the carbon fibre boosts Pershing's sporty design and its most iconic elements such as the stunning side wings and the aerodynamic profile of the sun deck. The ingenious and scenic integration of the stairway leading to the sport flybridge lets an aesthetic signature evolve into a functional element, thus leaving more space in the cockpit.

Performance

The twin engines ensure speeds of 45 knots in the standard version and up to 48 knots in the optional configuration. Pershing 8X is equipped with the groundbreaking system that integrates propulsion control with the manoeuvring, navigation and monitoring systems, which is accessible to the pilot via large natural carbon panels and 24" touchscreen monitors.

Comfort

The unrivalled combination of quality and innovation creates spaces which are exceptional in terms of both aesthetics and functionality. With dual side access, the main deck ensures intimacy and privacy. The helm station is a masterpiece of design, technology and sportiness. The innovative Music Hull system allows music to be listened to underwater, with high audio quality.

Interiors

Cabins 4

Crew cabins 2 standard

Bathrooms 3

Bathrooms in crew quarter 1

Upper Sundeck

- Carbon Fiber and teak-laid stairs with stainless steel handrail
