Summary/Description

The flagship model...the 530 LXF is meticulously crafted with cutting-edge Carbon Epoxy Construction (Carbon Fiber/E-Glass is the main material used in the Epoxy Infusion process) and the highest-performing dual Scout Stepped Hull Technology, while simultaneously pairing it with the finest sophisticated

MANUFACTURER WARRANTY UNTIL 2033 - Kept on a Sea Pen (a \$95K value) which can be negotiated into the sale.

Price Reduction as of 4/12/24

The flagship model...the 530 LXF is meticulously crafted with cutting-edge Carbon Epoxy Construction (Carbon Fiber/E-Glass is the main material used in the Epoxy Infusion process) and the highest-performing dual Scout Stepped Hull Technology, while simultaneously pairing it with the finest sophisticated blend of appointments and technologies.

Packed with unique features like the dual port and starboard hydraulic beach platforms creating an extended cockpit entertainment area, and a cabin down below with a master stateroom, convertible sofa-2-berth entertainment/sleeping area, aft berth, galley, separate head and separate shower... all with the most luxurious appointments ever found in this size.

Walk Through

Hull

The Epoxy-Infused hull using Carbon Fiber/E-Glass provides improved superior structural stability, strength and a Class-A finish, creating unsurpassed performance.

Articulating Rocket Launchers w/ Sunshade

With the touch of a button, you can electronically raise or lower the hardtop mounted rocket launchers. When the SureShade retractable awning is deployed, the rocket launchers will also lower electronically. Having the rocket launchers articulate not only provides an added unique feature to the boat, but also helps with ease of loading/unloading rods.

Digital Helm

Control on-board systems with the touch of a screen. Garmin screens encased in glass bezels provide the technological touch you've come to expect, as well as the seamless, modern styling they represent. The Garmin GRID (Garmin Remote Interface Device) is a control pad with mouse that allows you to access and control all Garmin screens aboard the 530.

Seakeeper Gyro Stabilizer System

Fully integrated into the 530 LXF, your standard Seakeeper 6 Gyro Stabilizer will provide you incredible comfort out on the water. Spin it up, and enjoy stability in the open seas as if you were on solid ground.

Dual Hydraulic Beach Platform

Dual electronically-actuated hydraulic beach platforms on the port/starboard side provide safe and easy access while boarding, de-boarding, and the ideal launch pad for water sports activities. When deployed, they create 17' 10" of beam deck, ideal for entertaining with 150 sq. ft. of cockpit space, or when raised, 105 sq. ft. of fishing space. In addition to

that, we have dual aft cockpit transom doors that fold out of the way, making navigating the stern a breeze.

Luxurious Interior

The appointments down below are unmatched in a model this size. You'll feel like you're stepping into a private jet, or a luxury home. Private master stateroom, convertible sofa-to-berth, private aft berth, enclosed separate shower, enclosed separate head, galley and hanging closet...and plenty of other hidden storage.
