Summary/Description

The Gran Turismo 41 is a thoroughbred. She offers top levels of comfort and ample thrills behind the wheel, making her the ideal pleasure boat.

DEALER DEMO - Brand New GT 41 model!

*****Available for Immediate Delivery *****

The Gran Turismo 41 is a thoroughbred. She offers top levels of comfort and ample thrills behind the wheel, making her the ideal pleasure boat. A stunning combination of power and practicality, she is perfect for sharing with friends and family.

Some key features include:

- Twin Volvo D6 380hps engines.
- Oversized electric sunroof.
- Electric submersible swim platform.
- Joystick piloting.

The new Gran Turismo 41 joins BENETEAU's express cruiser line renewal, which includes six models from 32 to 50 feet. The goal of this 41-foot powerboat was to build on the legacy of the Gran Turismo 40, well-known for its seaworthiness and beautiful design, while taking the practical features and Gran Turismo signature a step further. She stylishly follows in the tradition of her predecessor and focuses on the comfort of guests on board.

A key feature of the Gran Turismo 41 is the hard top . It combines the largest opening possible to enjoy the sun and sea with protection for all onboard. In comparison with the GT 40, the Gran Turismo 41 has extra-slim uprights so that the interior is bathed in a greater amount of light. The very large sliding roof, which comes as standard, gives further access to the open air, while offering protection if the need should be felt.

With her sporty hull and slender lines, the Gran Turismo 41 immediately conjures up speed and elegance, but she was also created with entertaining in mind. Everything on board is devised to make life easier and more enjoyable: safe movement around the boat, a highly-social U-shaped salon, a functional outdoor galley, and many comfortable relaxation spaces.

The lower deck is extremely comfortable, making it ideal for cruising and overnights. Apart from the galley and the head, there are two closed-off private cabins, each with beds parallel to the boat's centerline, offering optimum quality of life on board.

Air Step® technology increases the Gran Turismo 41's speed and stability by increasing the volume of air inflow under the hull. She accelerates faster, optimizing speeds and reducing fuel consumption. This patent has stood the test of time and offers excellent seakeeping, simpler passage through the waves, linear acceleration, and easy-handling of curves. The "Air cushion" effect is reinforced by rear pads; V-shaped steps further improve the boat's stability.
