## Summary/Description

The new 54-foot model from Yellowfin Yachts raises the bar in terms of what buyers can expect from a center console boat.

The 54 will provide the same exemplary level of stepped-hull performance that has made Yellowfin an industry leader with previous models, but the 54 takes things to a new level. This model is available with triple or quadruple outboard power. A spacious cabin area beneath the console will house a full queen berth, a fully equipped kitchenette, along with wraparound seating and a head. Hardcore fishing features abound as well, including 150 gallons of livewell capacity that can be configured as one massive well or split into two 75-gallon wells. There's also a huge, transverse fish box in the cockpit sole with an over 800 quart capacity. The 54 offers big-boat fishing capabilities combined with a high level of creature comforts, all delivered with the style and quality construction unique to Yellowfin.

PRICING varies depending on engine package and options selected. Call for detailed quote.
