Summary/Description

Designed by Francesco Guida, EXTRA 76 is the forerunner of the creative range that develops a new cruise concept, giving guests the chance to live in close contact with nature, creating a direct feeling with the sea both in navigation and at anchor, using all the comfort given by the large outside and inside volumes.

Two normal twin cabins complete the lower deck layout, offering the same stylish and modern look of the other cabins, based on the combination of light colours and precious materials.

On the main deck the galley is elegantly positioned to sit with access to the dining area in the cockpit through the big central glass panel, which slides down vertically to unite the

two areas. This layout is designed to encourage socialising.

Below deck, the full-beam owner's cabin features a special entrance area for privacy sake and includes a convenient walk-in closet as well as an en-suite bathroom with two basins and

separate shower. The arrangement of the basin also enhances the cabin's depth (completing the center of the whole suite).
