Engines/Generators

Summary/Description

'SV Eagle' , a 1980 Endeavour 43 Ketch is a Robert Johnson design, built by Endeavour Yachts of Clearwater, FL with a solid fiberglass hull and a closed cell cored decking. She has a molded keel a fixed long fin keel, with encapsulated ballast and a skeg hung rudder. Her standard bulkhead construction adds strength to hull sides as well as fixed furniture to create a uni-body construction that's well-bonded to the hull. The forward mast is stepped on the keel, while the aft mast is stepped on deck with a compression post.
