Manufacturer Provided Description

The Tiara 4300 Sovran with Volvo Penta's Inboard Performance System challenges every assumption about what a boat can be by changing the whole future of onboard performance while elevating enjoyment of the boating experience. On the 4300 Sovran, dramatically reduced noise and vibration allow conversations in comfort while underway. Because Volvo Penta's IPS releases up to 25% fewer emissions, owners enjoy diesel power performance, economy and durability without exhaust smoke, noise or vibration. In fact, Volvo Penta's IPS in the Tiara 4300 Sovran delivers 25% better fuel efficiency resulting in fewer trips to the fuel dock, increased speed, acceleration and extended cruising range. The 4300 Sovran also integrates the Volvo IPS Joystick control that puts unmatched low-speed maneuverability at your fingertips. With a single, subtle movement of the IPS Joystick, you command the IPS propulsion units to respond in any direction. This gives you the power to maintain control of your 4300 during tightquarter docking, coming about, reversing or even going straight sideways – all without the need for bow thrusters. Most importantly, because IPS takes up 25% less area in the 4300 Sovran, the design team was able to employ the newly available space as a full second stateroom with head. Design keys such as vessel sinks and shower partitions, a full-size refrigerator / freezer, even a spice rack and voluminous storage are but a few of the new options you will find. And the cockpit seating is both inviting and comfortable a perfect environment for the cruising lover.
