Overview

Meridian 441 Motor Yacht

Meridian appears to be one of the few builders that really knows its target: average cruising couples and families. Not gold-chainers, 'round-the-world dreamers, or YAH-ting wannabes with blue blazers and khaki pants. No, Meridian designs and builds its boat for – well, folks. Whether it's the Pilothouse, Motor yacht, or Sedan Series, Meridians are designed from the keel up to be easy to buy, easy to own, and easy to run by just about anyone.

The 441 Meridian continues that tradition. The first thing I noticed about her was not her styling (although I believe she's the best-proportioned Meridian to date, especially with the optional hardtop), but how easy it is to get around her. Getting aboard is unchallenging, whether from the side or via the three-foot-deep swim platform. So is entering the salon from the seven- foot-long covered cockpit, through an easy-sliding door and over a low threshold. Headed up to the bridge? The trip's a snap, thanks to an enclosed, molded -FRP stairway. And the passage to the foredeck will be a low-drama event even for landlubbers and little ones, thanks to nine-inch- wide side decks, 28-inch-high rails that come all the way back to the cockpit, and grabrails that run the length of the house. As for the foredeck, it's nearly flat and covered in aggressive nonskid and sunpads w/ drink holders. The bow rail rises to nearly chest height to protect you when anchoring. (Power&Motoryacht)

Salon

Inside, you'll find a layout not only easy to move around in, but quite similar to that of the 411, the boat the 441 replaces. Only a single step divides the salon from the galley-dinette deck, elevated to provide room for the mid-cabin beneath. With 360-degree glass (a window on either side tilts open about four inches) and 6'5" headroom, the area feels quite expansive.

Plenty of storage! Large area beneath the salon that's also easy to get to, thanks to a large hatch, stairs, and tilt-up handrail.
