Glasstream is the first boat builder that designed the "Stepped Hull" and have it patent!! Very impressive performance with their triple engine package exceeding 90 knots! This boat was custom built for the original and current owner. They wanted speed, range, and ride and Glasstream produced it using twin Mercury Verado 300's! Fully loaded with five people the 36 SCX will cruise @ 48 Knots getting a mile and a half per gallon which is exceptionally fuel efficient. If in a hurry the 36 SCX @ full throttles will run in the middle 60's. The boat has been stored in a covered building in Georgia without a scratch on her anywhere.
