Summary/Description

Deep Impact Boats build custom, performance-oriented center consoles one at a time. They are proven time and time again to be the fastest center console on the market. They are also very efficient and are certain to turn heads anywhere you take one.

Materials

All our hulls are reinforced with resin infused coring. The hullsides are cored with Mantex and Divinice and then further reinforced with bullet proof Kevlar layers. Deep Impact utilizes a resin infusion system for all fiberglass components. Infused parts are lighter, stronger, and more consistent, all of which makes a better boat.

Performance

Deep Impact's 36' and 39' models can accommodate up to four 350 HP engines utilizing the most advanced propellers, with speeds in excess of eighty-five miles per hour. Our engine installation team consists of members who have rigged champion offshore racing boats.

Customization

Every Deep Impact that we produce is as unique as its future owner. That is why every detail is customizable including countless combinations of possible deck layouts and color options. Call today to discuss your dream boat with one of our experts.

Notable Standard Features:

Fiberglass hard top with led lights flush mounted in the top and in the frame

Dual transom walkways make boarding convenient

Large forward fish box with macerator pump

Notable Opt

Deep Impact Boats build custom, performance oriented center consoles one at a time. They are proven time and time again to be the fastest center console on the market. They are also very efficient and are certain to turn heads anywhere you take one. The 36 model is offered in 4 different styles, and

any combination of those can be combined for a truly custom boat designed exactly how you like her.

Engineering

Deep Impact's computer engineered multi-step hull was designed to do two things very well: 1) go fast, and 2) go fast with comfort. The multi-step hull produces nearly 20% more speed and miles per gallon.**ional Features:**

Two different types of forward seating

Sport bolster seating available for the driver, transom and console

Available Carbon Fiber parts allow for a level of finish far above what others offer

Anchor windlass with stainless steel anchor and bow plate

Sound System options from 4 to 20+ speakers
