Manufacturer's Information

Revolutionary Design

The 370z represents the next level of thinking for design when it comes to center console fishing boats. More is possible. And the 370z leads the way. Masterful engineering has resulted in a light cored hull featuring twin steps for maximum speed and efficiency, plus 20% more deck space and storage capacity than any boat in its class. If multi-day trips to distant destinations are in your future, the 370z should be on your list.

Individual results will vary with engine package, load and conditions.

Step up Performance

Every SeaVee Z features a twin stepped, cross-ventilated hull with patented SpeedRail® technology. Multiple lifting bodies with unique geometry ensure a fixed trim angle throughout a wide range of speeds. That's a fancy way of saying you always have a clear view of the horizon, maximum fuel efficiency, more speed and safe predictable handling when making hard turns.

The 370z makes the most of this hull design. Capable of planing at very low speeds, the 370z can comfortably cruise through the roughest seas and glide across tightly spaced waves at high speed. Turns are sharp, crisp and stable. Reverse chines redirect spray away and downwards for a dry ride. Experience the 370z for yourself. Inquire about a sea trial today.
