LOA: 36' 8" (11.19m)		

## Engines/Generators

### Engine 1

Lombardini  
LDW702  
Inboard  
Fuel: Diesel  
Year: 2016  
Location: Middle

## Summary/Description

This is a Farr design that incorporates the best in performance features which include a canting keel, twin retractable canards & twin rudders. Built by Premier Composite Technologies of Dubai this model was originally outboard powered, but has now a Lombardini diesel with the Lombardini saildrive. The boat was shipped to the Bruckman yard in 2022 in Oakville for a complete bottom, topside & deck re-painting. This year a new B&G Nemesis instrument suite including an Autopilot were added. New batteries were also added this year. The electrics including a new charging system have all been upgraded to a high professional standard. For shipping, the keel can be removed, the mast separates in 2 & the cradle is folding. The whole unit can be put in a 40 shipping container or flatbed truck.
