Summary/Description

For Sale

The 48 Viking Sport Tower yacht is one of the models within a model of the very popular Viking 48 Convertible, the Viking Sport Tower has the same running surface and design but is equipped with a Palm Beach Towers tuna tower. The Viking 48 Sport Tower is a true blue-water champion in spirit, performance, accommodations

Aboard the 48 ST, an air-conditioned three-sided fiberglass deckhouse adds an attractive and distinctive look along with definition and versatility. A custom tuna tower also provides a fully rigged, upper helm station.

The accommodations share a commonality of comfort and style, providing practicalities for fishing, cruising, day trips, or overnight stays. The choice of teak or walnut joinery with a high gloss or rich satin finish are gorgeous options to accommodate the salon, along with a flat-screen television and entertainment system with surround sound, an L-shape lounge, and hi-lo cocktail table. The galley is to port, with a full set of amenities; under counter refrigeration, electric cooktop, microwave/convection oven, stainless-steel sink with nickel fixtures, and plenty of stowage space. The master stateroom allows for a queen berth and private access to the head and shower. An additional stateroom features upper and lower berths for ample sleeping room and privacy.

Superb visibility is provided at the raise platform at the forward helm station allowing the operator to view excellent sightlines while accessing navigation and communication accessories in the molded console. Power-assisted hydraulic steering and single-lever engine controls deliver quick and precise responses behind the wheel.

The 124 square-foot cockpit includes a split mezzanine with lounge seating and built-in stowage space. Centerline steps leading to the command deck provide lift access to the engine room. Useful space is available in the recessed dunnage box, a fish well, insulated drink and bait box coolers, and a transom live well. A walk-through transom door with a lift gate serves boarding access, and fish landing convenience. The boats are prepped for an optional Seakeeper SK 9 gyro stabilizer, which can be installed on the production line, or at a later date.
