undefined Manufacturer Provided Description

The exceptional ride of the Generation 450 yacht tender's deep V-Hull plus the additional 75HP rating results in exhilarating performance. The superior layout, ample storage and the integrated ski pole and boarding ladder in this deluxe yacht tender provide more fun on and in the water.

The Generation 450 is built using Walker Bay's proprietary Polyurethane Composite Micro Stringer system making the hull lighter and stronger. The Generations also have a unique approach to joining the hull and deck using a unidirectional glass and polyurethane grid bonding system that eliminates the air cavity found in other RIBs. The result is a stronger hull that better absorbs wave chop, and its lighter weight gives a faster top speed and makes it quick to plane.
