Summary/Description

The visibility and light in this design makes you feel you are part of the water.

Windows and skylights, with options to open, screen and/or shade make it versatile and filled with light.

The largest Back Cove built to date, she is fitted with an efficient single Cummins QSM-11 715hp diesel engine. Bow and stern thrusters with the Easy Dock system and Zipwake trim system all for stress free boating. A generator set and reverse cycle heat and air conditioning systems are standard.

Two comfortable staterooms each with a private head. Centralized galley location serves the open air cockpit as easily as the salon. Perfect for entertaining or ease of movement while underway.

Kevin Burns, Vice President of Design and Product Development states:

"The 41 was conceived from the onset to serve as the flagship of the Back Cove fleet. Clean, purposeful lines and naturally pleasing proportions dominate the profile and are supported by serious attention to the sculpted details that set today's Back Coves apart from their peers."

This boat has been maintained to the hilt and currently is inside stored for the winter.
