Summary/Description

The 9.5M Beachlander by Ocean Craft Marine is an amphibious tender that allows direct driving access to the beach or remote islands. With a maximum power rating of 600 HP and a recommended rating of 350.

Customizable Boat: Sarasota

The 9.5M Beachlander by Ocean Craft Marine is an amphibious tender that allows direct driving access to the beach or remote islands. With a maximum power rating of 600 HP and a recommended rating of 350, the Beachlander reaches speeds of over 50 knots. It has the capacity to carry 15 passengers on the water and 8 on land, making it a fantastic guest transport tender or boat for crew activities.

The bow of the Beachlander opens for direct dry access to the beach for easy boarding and unloading, easy dive entry and exit, and safe swimming opportunities for families. The combination of amphibious capabilities and an opening bow provides unprecedented ease of access for guests to the beach.

The amphibious system is fully marinized and consists of four motorized, retractable wheels that power the boat onto beaches, remote islands, up boat ramps, and allow easy storage next to beach houses. Crafts with amphibious technology require only one operator as anchoring at the beach and trailering are not necessary.

Highly customizable, the Ocean Craft Marine can be fitted with many options to suit any program. Choose from an aluminum or fiberglass hull, foam or air filled tubes, inboard or outboard engines, bench seats, bucket seats, jockey seats, leaning posts, shock mitigating seats, a T-top, a Bimini top, console options, a self-righting frame, or bow and stern posts.

We're proud to showcase Ocean Craft Marine at all our Florida showrooms, including:

Ft. Lauderdale, Palm Beach, Stuart, Sarasota, and Tampa Bay.
