Steering System

Joystick Control

Manufacturer Provided Description

With its new hull, wider beam, and larger cockpit, the new 41 Valor is a terrific example of the way customer requests drive the continual innovation that sets Intrepid apart from any other outboard powerboat brand on the water. As more Intrepid owners expressed their desire to have the power of Yamaha 425s or Mercury 600s on our Valor lineup, we responded as we always do, by delivering on their dreams. These suggestions, along with other recent requests from passionate Intrepid enthusiasts, inspired us to enhance the design and capabilities of one of our best-selling models.

Additional enhancements to this model include a redesigned console helm with more room for larger electronics, a modified transom platform with new pass-through walkway and staircase, a modified companionway door, and increased fuel capacity for the state-of-the-art engine packages that will let you get there faster and stay longer aboard the custom Intrepid of your dreams.
