Summary/Description

Penned by Nauta Design in collaboration with the Francesco Rogantin's Names naval architecture studio, Heritage 9.9 is a work of the renowned Castagnola Yacht. This highly exclusive custom-built from wood and carbon-fibre boat is designed for use as a luxury yacht for short cruises or as a large sup

Heritage 9.9 was launched in August 2020 but very lightly used since then, with only 110 engine hours at current moment. In the last 2 years she was a display yacht for Castagnola shipyard, successfully attending the main Mediterranean boat shows. She never had a private owner and she looks now in like-new conditions.

This highly exclusive custom-built wood and carbon-fibre boat is designed to be used as a luxury yacht for short cruises, as a large superyacht tender or even as a weekender or day-cruiser. Aimed at a discerning, quality-focused client seeking a uniquely special product, Heritage 9.9 was penned by Nauta Design in collaboration with the Francesco Rogantin's Names naval architecture studio.

Her peerless performance figures include a 33-knot cruising speed and a 39-knot top speed. The meticulous attention to detail reflects the astonishing artisanship of the craftsmen involved in its construction. Artisanship and modernity thus combine in the Heritage 9.9's materials and building techniques. Clothed in classic lines with a distinctive retro charm effortlessly melded with a modern arrangement and contemporary techniques and materials, she is now on the market at a very interesting, newly reduced price.
