Loaded with Options (see specs) you will not find a better optioned 355 LXF Scout

Meticulous Original Owner, Dealer Maintained

Manufacturer Description

High performance is just one attribute of this incredible 355 LXF model. The deck was designed to accommodate an optional Seakeeper 3DC gyro stabilizer just under the aft-facing bench seat, and for protection from the elements, just engage the optional electric fiberglass cockpit sun shade. Other notable innovations on this model include standard independent heated seats at the helm, a standard integrated forward-facing anchor camera in the bow allowing you to see what's going on in front of you via the helm touch screen displays, and solar panels that provide a trickle charge to AGM batteries when the Seakeeper 3DC is ordered for a longer battery life. And that's just above deck. Just wait until you step down into the cabin and find all the luxurious appointments, headroom and attention to detail this beauty provides.

This boat signifies the upper echelon of our line-up - the highest level of luxury - similar to what you experience with high-end luxury automobiles. The 355 LXF is meticulously crafted with cutting-edge Epoxy Infusion Construction and the highest-performing dual Scout Stepped Hull Technology, while simultaneously pairing it with the finest sophisticated blend of appointments and technologies. Our S-Class denotes the most superior model for our customers.
