Verado
Outboard 4 Stroke
350HP
261KW
Fuel: Gas/Petrol
Hours: 500
Year: 2018
Location: Middle

Engine 3

Mercury
Verado
Outboard 4 Stroke
350HP
261KW
Fuel: Gas/Petrol
Hours: 500
Year: 2018
Location: Starboard

Summary/Description

The Scout 380 XLF has a is epoxy-infused hull, which provides stability while reducing the overall weight(6.5 tons) and improves the passengers ability to bring provisions.

The Scout 380 XLF has a is epoxy-infused hull, which provides stability while reducing the overall weight(6.5 tons) and improves the passengers ability to bring provisions. You will climb on board through a side door on the port side of the cockpit, and see multiple lockers, live wells, compartments, and seating available both under the flooring and along the cockpit sides. However, they can disappear to make the new owners and their guests enjoy their fishing trip or boat day with the family on an uncluttered surface totaling close to 95 sqft, size commonly found on large Fisherman style Boats. You will cruise in comfort or fish offshore regardless of the seas with the oversized Seakeeper 6 keeping everything smooth and steady. When you return to the dock the convenience continues with the added aftermarket Bow-thruster upgrade to assist in tight maneuvering.

Aft of the T-top, the push of a button will open a electric shade to provide a large cool area to relax in while pivoting the Rod Holders out of the way. As you move forward bulkheads become increasingly high to create a well-protected area to walk as well as sit or lounge on the bow dinette/sun pad area, or the chaise lounge forward of the console.

Down below in the cabin of the Scout 380 LXF, she has comfortable overnight accommodations consisting of a convertible dinette, a fully-equipped galley and a bathroom with a separate shower compartment. The space is designed to accommodate five different rods, while the headroom is enough for the tallest owners. On the starboard side, a galley is equipped with a micro-wave oven, refrigerator, and electric burners while a 12,000-btu A/C with multiple nozzles can lower temperatures to arctic temratures even in the warmest climates.
