BROKERS WALK THRU

Wow what a great boat. These Tri-toons made by Manitou are built to be the best there is to offer. And this one is a rocket ship. Not only that but she has all the bells and whistles. You can cruise to your destination at a very quick 40 MPH, or get out of approaching bad weather even quicker at 60 MPH.

She features Joystick handling making docking and trailer approached a breeze even in the tightest situation. Just move the boat in sideways if you like. The Radar arch is not only retractable it is also power operated. Push a button to go down.. Push a button to go up.

The sellers absolutely love this boat. They have the greatest of times on it. They plan on getting another new one in a year or two. The seller just took on a construction project that will not allow the time for boating for at least a year. They do not want her to sit around.

She has gotten a little dusting sitting for the last couple weeks, I have a detailer that will be out giving it a complete detail by mid February.

These engines are great engines minus what you may have heard. They are faster and have way more torque compared to their rivals. They require much less maintenance (every three years or 300 hours vs every year or every 100 hours) They will be slightly louder than a 4 stroke at idle speeds, but man listen to those twin engines purr in the video.

This is a Great boat. I hope you see it my way, come on down and get a look or make your offer. Lets get a deal done!

Manufacturer Provided Description

Built to perform, the X-Plode is the pontoon that refuses to act like one. It carves, it banks, it explodes out of the water. Whether you're at the helm or on board, you know this is no ordinary ride. Even better, it delivers all that while still offering all the comfort and amenities you expect from a top-of-the-line pontoon. Sacrifice nothing, and get the boat that offers everything.
