Mase

Summary/Description

This Rio Yachts Daytona 50 has dual opening beach doors, one on either side of the cockpit opening your space to have a full 20 foot width of entertainment space

DAYTONA 50

INNOVATION

Its main characteristics include walk around deck and central console, maximum space on board thanks to a boundless cockpit, total safety, and ease of movement above deck: a boat designed to socialize, enjoy, and relax.

A 15-metre (49 foot) yacht that offers a brilliant and fun performance, able to reach a maximum speed of over 40 knots, with the option of either 3 outboard or 2 inboard diesel engines.

The lines are clean and symmetrical. The wraparound wind shield offers perfect visibility. The sleek bow reflects the strong personality of the design.

The spacious cockpit has a generous stern sun deck under which there is space for a tender. The bathing platform, spacious even on the version with the outboard engines, can be fitted with a tender lift and two amazing large terraces can be opened both on the right and on the left, adding substantial space to the already impressive cockpit and providing a unique connection with the water. The table in the cockpit can easily accommodate six people and is completely concealable. Midship, a spacious open-air galley separates the cockpit from the highly technological, functional, and practical helm station, covered by a convenient, sporty, and light Bimini with just two supports (instead of the usual four featured by the competition), yet extremely stable, which offers generous coverage. The addition of an electric cover from the Bimini and two shades at the bow and the stern offer plenty of options to manage sun and shade as required.

The walkway to the bow is wide, practical, and safe. A two-seat sofa is just a few strides away, opposite the sun lounger on the deckhouse.

The interior is open space, bright and finished with great attention to details. If needed, when guests are on board, the cabins can be divided thanks to a mobile partition, creating privacy and exclusive comfort. The materials, which can be personalized by the owner, are the expression of the highest level of quality that only Made in Italy can provide.

All you have to do is... get on board!
