250KW
Fuel: Electric
Year: 2023

Summary/Description

The streamlined sister to the Ocean Eco 60 and Eco 60 EX, the Coupé offers an unlimited range, generous social spaces and exceptional handling, even in the toughest conditions. As with the Eco 60, the new model has been designed with responsible yachting at its core.

The streamlined sister to the Ocean Eco 60 and Eco EX 60, the Coupé offers an unlimited range, generous social spaces and exceptional handling, even in the toughest conditions.

As with the Eco 60, the new model has been designed with responsible yachting at its core. Its expansive roof has been specifically conceived for its integrated solar panels, giving her a transatlantic range and virtually unlimited autonomy. The solar panels take energy from the sun and store it in the battery bank that power the electric engines.

In the enhanced power variant, the Coupé is propelled by two 250 kW electric motors, connected to a 150–280 kWh battery bank, which is kept charged by either the sun or two 50kW generators. The solar panels reach 18 kWp (Kilowatt peak), which is best in class compared to competitors.
