Engine

Upgraded with a Cummins Marine 300 hp in 2000 with only 702hrs with two 250 gallon stainless fuel tanks

This trawler has two state rooms with heads and separate stall showers - 150 gallon water capacity.

A reverse Cruisair System with three controls, one in the galley and one in each stateroom and a 10kw generator offer cruisers comfort regardless of weather.

"Bal Capri" recently completed a full systems check and cruised in Northern New Brunswick and Gaspé Coast confirming all systems are in good working conditions.

Offered with both lower and upper helms and a bimini on the flybridge.
