Summary/Description

The Boston Whaler 16 Dauntless has big boat features in an easy-to-trailer size.

The 16's Accutrack hull has a deep-V entry for a softer ride and great rough-water performance.

Reversed chines give it lateral stability and a dry ride. And Boston Whaler's unsinkable Unibond construction means this boat will get you where you're going and back, too.

Great for a novice boater or perfect boat for the kids to enjoy the bay!

Dependable and proven Boston Whaler hull!!
