Summary/Description

Every Carver Yacht is crafted with the confidence that comes from more than 50 years of quality boat-building expertise. Carver continues to raise both structural standards and customer expectations through generations of handcrafted skills that put their manufacturing in a class by itself.

Among the top-selling boats in her class for several years, the Carver 3607 Aft Cabin was the biggest boat ever built by Carver when she was introduced in 1982!

Immediately successful due to her smart styling and space-efficient layout, the 3607 was built on a so-called "dual mode" hull, meaning that she can run efficiently at her 8-knot hull speed and still plane out when the throttles are fully applied. The interior accommodations of the 3607 Aft Cabin are surprisingly roomy for a 36-footer. A lower helm was standard, as was a tub/shower in the aft head. Outside, the aft deck is large enough for a few folding chairs, and the bridge is only three steps up with guest seating for four. The side decks are wide enough for easy bow access—a plus on any small cruiser. Standard 350hp Crusader gas engines will cruise the 3607 Aft Cabin at 15–16 knots.
